Mobile Signal Booster Loan Scheme

Poor mobile connection or mobile coverage too weak for your phone? It could be improved with a signal booster at your property.

The River Severn Partnership is working with Warwickshire County Council to loan equipment to businesses across the River Severn Catchment to see if the **4G** and or **5G** signals can be improved.

Once qualified, equipment and installation guides will be dispatched and technical support will be on hand. At the end of the loan, the equipment will be collected free of charge.

To find out more contact
rspsignalbooster@warwickshire.gov.uk

Please note, the scheme is only intended to demonstrate what is possible and is a short-term loan only
